PRODUCT HIGHLIGHTS SHEET
AFFIN HWANG AIIAMAN GROWTH FUND
BRIEF INFORMATION ON THE PRODUCT
1. What is this product about?

Affin Hwang Aiiaman Growth Fund is an open-ended Shariah-compliant equity and growth fund, issued and managed in-house by the Manager.

The Fund seeks to provide investors with consistent capital appreciation over the medium to long-term by investing in equities and other approved investments which harmonise with Islamic philosophy and laws.

PRODUCT SUITABILITY
2. Who is this product suitable for?

The Fund is designed for retail investors who are medium to long-term investors, risk tolerant and seek higher returns than the benchmark on investments that comply with Shariah requirements.

KEY PRODUCT FEATURES
3. What am I investing in?

Launch Date	8 October 2002
Tenure	The Fund is an open-ended fund where it does not have a fixed maturity date and may only be terminated in accordance with the terms of the Master Prospectus and the provisions of the Deed.
Investment Strategy	<p>The Fund will focus on achieving its objective by investing a minimum of 70% of the Fund's NAV into Shariah-compliant equities and the remaining will be invested in Islamic money market instruments, Shariah-based deposits, and/or help in cash.</p> <p>The Fund will also have the flexibility to hold exposure in Shariah-compliant warrants as well as Shariah-compliant collective investment schemes that have similar investment objectives to the Fund.</p> <p>Temporary Defensive Position</p> <p>We may take temporary defensive measures that may be inconsistent with the Fund's principal strategy, and asset allocation to protect the Fund against adverse market conditions. TO manage the risk of the Fund, we may shift the Fund's focus into lower risk investments such as Islamic money market instruments and/or Shariah-based deposits.</p> <p>Policy on Active and Frequent Trading of Securities</p> <p>We take an active trading policy where we look to maintain some core holdings that are held over the medium to long term which is similar to a buy and hold strategy. We will also maintain a trading portion for the portfolio, which we use to take advantage of beneficiaries during prevailing market conditions with the aim of boosting the Fund's performance.</p>

5. What are the possible outcomes of my investment?

This is an equity fund that invests in local equities. The Fund's investment into equities would to a great extent, be linked to the price movements of the local equity market. If the local equities that are investable by the Fund performs well, the Fund's performance may reflect the same. However, should the local equities that are investable by the Fund performs poorly, the Fund's performance may also be impacted negatively.

The Fund endeavours to distribution income, if any, on an annual basis. However, due to investments in equities, the Manager expects the Fund to yield incidental growth in capital.

Please note that the capital and returns of the Fund are not guaranteed.

KEY RISKS

6. What are the key risks associated with this product?

General Risks

- **Market risk** – Market risk arises because of factors that affect the entire marketplace. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative.
- **Fund management risk** – This risk refers to the day-to-day management of the Fund by the Manager which will impact the performance of the Fund. For example, investment decisions undertaken by the Manager as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraudulence, dishonesty or weakness in operational process and systems, may adversely affect the performance of the Fund.
- **Performance risk** - There is no guarantee in relation to the investment returns or on the distribution of income to Unit Holders.
- **Inflation risk** – This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
- **Liquidity risk** - Liquidity risk arises in two scenarios. The first is where the Fund's investment cannot be sold due to unavailability of a buyer for that investment. The second scenario exists where the Fund's investment, by its nature, is thinly traded.
- **Financing risk** – This risk occurs when you take a financing to finance your investment. The inherent risk of investing with financed money includes you being unable to service the financing repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower net asset value per unit as compared to the net asset value per unit at the point of purchase towards settling the financing.
- **Credit and Default risk** – Credit risk relates to the creditworthiness of the issuers of the investment (Islamic money market instruments) and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the investment. Default risk relates to the risk of an issuer of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment.
- **Interest rate risk** - The level of interest rates has an impact on the value of investments and economic growth of a country. High interest rates dampen investments and aggregate demand leading to an economic slowdown. The value of Islamic money market instruments move in the opposite direction of interest rates, any increase in rates will lead to a reduction in the value of Islamic money market instruments, thus affecting the NAV of the Fund.
- **Reclassification of Shariah status risk** – This risk refers to the risk that the currently held Shariah-compliant equities in the Fund may be reclassified to be Shariah non-compliant in the periodic review of the equities by the Shariah Advisory Council (“SAC”) of the SC, the Shariah Adviser or the Shariah boards of the relevant Islamic indices. If this occurs, we will take the necessary steps to dispose of such equities.

Specific Risks

- **Equity investment risk** – This is the risk associated with investing in a particular equity. The value of individual equity is mainly determined by its potential growth in earnings, sound management, and treatment of minority shareholders, as well as a myriad of other factors. Failure to achieve these would result in declining investment value which in turn affects the performance of the Fund.
- **Shariah-compliant warrants investment risk** – The value of the Shariah-compliant warrants (“warrants”) will depend on the pricing of the underlying security whereby the growth and performance prospect of the underlying security would consequentially affect the value of the warrants. In addition, the value of the warrants may decrease exponentially as the warrants approach its maturity date and the potential gains from a favourable price movement of the underlying may be offset by aggressive time decay.

Note: Please refer to Risk Factors section of the Fund's Prospectus on further detail of each risk.

Asset Management

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Prospectus to assess risks associated to the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.

Fund Performance vs Benchmark

Benchmark: FTSE Bursa Malaysia Emas Shariah Index

For the period 1 September 2015 to 31 August 2016, the Fund registered a return of 8.19%. The Net Asset Value (NAV) per unit of the Fund as at 31 August 2016 was MYR 1.0114 while the NAV at 31 August 2015 was MYR 0.9442. The benchmark for the period registered a return of 8.63%. The Fund unperformed the benchmark by 0.44%.

Since its inception to 31 August 2016, the Fund has registered a return of 399.55%. Compared to the benchmark that rose 160.60% in the same period, the Fund had outperformed the benchmark by 238.95%. As such, the Fund has met its objective.

Asset Management

Basis of calculation and assumption made in calculating the returns:-

The performance figures are a comparison of the growth/decline in NAV for the stipulated period taking into account all the distribution payable (if any) during the stipulated period.

An illustration of the above would be as follow:-

Capital return	=	NAV per Unit end / NAV per Unit begin – 1
Income return	=	Income distribution per Unit / NAV per Unit ex-date
Total return	=	(1+Capital return) X (1+Income return) - 1

Income Distribution

	As at 31 August 2016	As at 31 August 2015	As at 31 August 2014
Gross distribution per Unit (sen)	1.00	1.50	5.00
Net distribution per Unit (sen)	1.00	1.50	5.00

Distribution will be made in the form of cash as well as Units in lieu of cash, if any.

Portfolio Turnover Ratio (PTR)

	FYE 2016	FYE 2015	FYE 2014
PTR (times)	0.32	0.65	0.75

The Fund's PTR was lower than the previous period due to lower portfolio trading activity.

FEES & CHARGES

7. What are the fees and charges involved?

There are fees and charges involved and you are advised to consider them before contributing to the Fund.
