PRODUCT HIGHLIGHTS SHEET
AFFIN HWANG SELECT OPPORTUNITY FUND
BRIEF INFORMATION ON THE PRODUCT
1. What is this product about?

Affin Hwang Select Opportunity Fund is an open-ended equity fund, issued and managed in-house by the Manager.

The Fund aims to achieve consistent capital appreciation over medium to long-term by investing mainly in listed Malaysian companies with good growth prospects.

PRODUCT SUITABILITY
2. Who is this product suitable for?

The Fund is designed for retail investors who are risk tolerant and seek higher returns for their investments compared to the performance benchmark.

KEY PRODUCT FEATURES
3. What am I investing in?

Launch Date	7 September 2001
Tenure	The Fund is an open-ended fund where it does not have a fixed maturity date and may only be terminated in accordance with the terms of the Prospectus and the provisions of the Deed.
Investment Strategy	<p>The Fund will focus on achieving its objective by investing in a diversified portfolio consisting a minimum 70% of the Fund's NAV in equities and a maximum 30% of the Fund's NAV in debentures, money market instruments and/or deposits.</p> <p>As the Fund holds a domestic focus, we will maintain a minimum 70% of the Fund's investment into the domestic market, and hold a flexibility to invest up to 30% of its NAV in investments listed/issued in foreign markets.</p> <p>While the Fund's core investments will remain in equities, the Fund holds the option to invest into fixed income instruments such as debentures, money market instruments and deposits.</p> <p>We typically take an active trading policy where we look to maintain some core holdings that are held over the medium to long term which is similar to a buy and hold strategy. We will also maintain a trading portion for the portfolio, which we use to take advantage by participating in investment opportunities that are set to benefit from prevailing market conditions, with the aim of boosting the Fund's performance.</p> <p>To achieve its objective, the Fund will also have the flexibility to hold exposure in warrants as well as collective investment schemes that have similar investment objective to the Fund.</p>

Asset Management

	<p>Foreign Investments</p> <p>The Fund may invest up to 30% of its NAV in investments listed or issued in foreign markets. The decision to invest into foreign markets will be opportunistically driven where we would seek out investments that could provide a potential to enhance the returns of the Fund. The Fund will invest only into countries where the regulatory authorities are ordinary or associate members of the International Organization of Securities Commissions (IOSCO).</p> <p>Derivatives</p> <p>Derivative trades may be carried out for hedging purposes, through financial instruments including, but not limited to, forward contracts, futures contracts and swaps. Future and forward contracts are generally contracts between two parties to trade an asset at an agreed price on a pre-determined future date. Swaps, whereas, is an agreement to swap or exchange two financial instruments between two parties.</p> <p>The intention of hedging is to protect the value of the asset from any adverse price movements. For example, to hedge against foreign currency exchange risk, the Fund may enter into a currency forward contract to offset any adverse foreign currency movements by determining an agreed rate for an agreed tenure with its counterparty. While these hedging transactions would protect the Fund against potential losses, trades for hedging purposes would also limit the returns that the Fund may have potentially received from foreign exchange gains would the Fund not have hedged its foreign currency exposure.</p> <p>Temporary Defensive Position</p> <p>We hold the option to take temporary defensive positions that may be inconsistent with the Fund's principal strategy and asset allocation to protect the Fund against adverse market conditions that may impact financial markets. To manage the risk of the Fund, we may shift the Fund's focus and hold a higher exposure into lower risk investments such as money market instruments and/or deposits.</p>						
<p>Asset Allocation</p>	<table border="1"> <thead> <tr> <th data-bbox="579 1420 981 1469">Asset Class</th> <th data-bbox="981 1420 1383 1469">% of NAV of the Fund</th> </tr> </thead> <tbody> <tr> <td data-bbox="579 1469 981 1532">Equities</td> <td data-bbox="981 1469 1383 1532">Minimum of 70%</td> </tr> <tr> <td data-bbox="579 1532 981 1603">Debentures, money market instruments and/or deposits</td> <td data-bbox="981 1532 1383 1603">Maximum of 30.0%</td> </tr> </tbody> </table>	Asset Class	% of NAV of the Fund	Equities	Minimum of 70%	Debentures, money market instruments and/or deposits	Maximum of 30.0%

5. What are the possible outcomes of my investment?

This is an equity fund that invests predominantly in domestic equities, with the ability to access foreign equity investment opportunities. The Fund's exposure into foreign equities will be capped at 30% of the Fund's NAV.

The performance of the Fund would be dependent on the domestic equity market, and to a certain extent, the foreign equity markets that are investable by the Fund. The Fund's performance is reliant on the Manager's expertise in managing the Fund to meet its objective.

The Fund's investment into equities would, to a great extent, be linked to the price movements of the domestic and/or foreign equity markets. If the equities that are investable by the Fund performs well, the Fund's performance may reflect the same. However, should the equities that are investable by the Fund perform poorly, the Fund's performance may also be impacted negatively.

The Fund endeavours to distribute income, if any, on an annual basis.

Please note that the Fund does not guarantee your investment capital nor the returns from the Fund.

KEY RISKS

6. What are the key risks associated with this product?

General risks

- **Market risk** – This risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the Fund's NAV.
- **Fund management risk** – This risk refers to the day-to-day management of the Fund by the Manager which will impact the performance of the Fund. For example, investment decisions undertaken by the Manager as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraudulent, dishonesty, or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
- **Performance risk** - There is no guarantee in relation to the investment returns or on the distribution to Unit Holders.
- **Inflation risk** – This is a risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
- **Liquidity risk** – Liquidity risk refers to two scenarios. The first is where an investment cannot be sold due to unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund.
- **Operational risk** – This risk refers to the possibility of a breakdown in the Manager's internal controls and policies. The breakdown may be a result of human error, system failure or may be fraud where employees of the Manager collude with one another. This risk may cause monetary loss and/or inconvenience to you.
- **Loan financing risk** - This risk occurs when you take a loan or financing to finance your investment. The inherent risk of investing with borrowed money includes you being unable to service the loan repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per unit as compared to the NAV per unit at the point of purchase towards settling the loan.

Specific risks

- **Stock specific risk** – Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV.
- **Credit and default risk** – Credit risk relates to the creditworthiness of the issuers of the debentures or money market instruments (hereinafter referred as "investment") and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the investment and this may lead to a credit downgrade. Default risk relates to the risk of an issuer of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment. This could adversely affect the value of the Fund.
- **Interest rate risk** – This risk refers to the impact of interest rate changes on the valuation of debentures or money market instruments (hereinafter referred as "investment"). When interest rates rise, the investment prices generally decline and this may lower the market value of the investment. The reverse may apply when interest rates fall.
- **Warrants investment risk** – The value of the warrants will depend on the pricing of the underlying security whereby the growth and performance prospect of the underlying security would consequentially affect the value of the warrants. In addition, the value of the warrants may decrease exponentially as the warrants approach its' maturity date and the potential gains from a favourable price movement of the underlying may be offset by aggressive time decay. We may consider unwinding these warrants if there are material adverse changes to its' value with the aim to mitigate the risk.
- **Country risk** – Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests.

Asset Management

- **Currency risk** – As the investments of the Fund may be denominated in currencies other than the base currency, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.
- **Regulatory risk** - The investments of the Fund would be exposed to changes in the laws and regulations in the countries the Fund is invested in. These regulatory changes pose a risk to the Fund as it may materially impact the investments of the Fund.

Note: Please refer to Risk Factors section of the Fund's Prospectus on further detail of each risk.

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Prospectus to assess risks associated to the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.

Fund Performance vs Benchmark

Benchmark: FTSE Bursa Malaysia Top 100 Index.

Source: Bloomberg

For the period under review from 1 August 2015 to 31 July 2016, the Fund registered a return of 7.13%, outperforming the benchmark return of -2.47% by 9.60 percentage points. The NAV per Unit as at 31 July 2016

Asset Management

was MYR0.9309 compared to the NAV per Unit of MYR0.8976 as at 31 July 2015. During the same period under review, the Fund has declared a total gross income distribution of MYR0.03 per Unit.

The outperformance of the Fund was attributed to the better performance of global markets, and stringent investment strategy taken by the Manager. Cash levels were generally kept at moderate levels due to the uncertainties from global economies. The objective of the Fund was met over the period under review.

Basis of calculation and assumption made in calculating the returns:-

The performance figures are a comparison of the growth/decline in NAV for the stipulated period taking into account all the distribution payable (if any) during the stipulated period.

An illustration of the above would be as follow:-

Capital return	=	NAV per Unit end / NAV per Unit begin – 1
Income return	=	Income distribution per Unit / NAV per Unit ex-date
Total return	=	(1+Capital return) x (1+Income return) - 1

Income Distribution

	As at 31 July 2016	As at 31 July 2015	As at 31 July 2014
Gross distribution per Unit (sen)	3.0	5.0	5.0
Net distribution per Unit (sen)	3.0	5.0	5.0

Distribution will be made in the form of cash as well as Units in lieu of cash, if any.

Portfolio Turnover Ratio (PTR)

	FYE 2016	FYE 2015	FYE 2014
PTR (times)	1.22	1.36	1.27

The PTR was lower during the period under review due to less portfolio action.

FEES & CHARGES

7. What are the fees and charges involved?

There are fees and charges involved and you are advised to consider them before contributing to the Fund.

What will I be charged by the Manager?

Sales charge	Up to 5.50% on the NAV per Unit of the Fund. <i>Note: The Sales Charge for the Fund shall be limited to the maximum charge of 3.00% of NAV per Unit or as determined by EPF for investors who purchased the Units through the EMIS.</i>
Repurchase charge	Nil
Switching fee	Nil
Transfer fee	RM5.00 per transfer

What are the key ongoing fees charged to the Fund?

Management fee	Up to 1.50% per annum of the NAV of the Fund.
Trustee fee	Up to 0.07% per annum of the NAV of the Fund, subject to a minimum of MYR18,000 per annum (excluding foreign custodian fees and charges).

Asset Management

ALL FEES AND CHARGES ARE EXCLUSIVE OF GOODS AND SERVICES TAX. WE (INCLUDING THE TRUSTEE AND/OR OTHER SERVICE PROVIDERS) WILL CHARGE GOODS AND SERVICES TAX AT THE PREVAILING RATE OF 6% ON THE ABOVEMENTIONED FEES AND CHARGES IN ACCORDANCE WITH THE GOODS AND SERVICES TAX ACT 2014.

! YOU SHOULD NOT MAKE PAYMENT IN CASH TO A UNIT TRUST CONSULTANT OR ISSUE A CHEQUE IN THE NAME OF A UNIT TRUST CONSULTANT.

VALUATIONS AND EXITING FROM INVESTMENT
