	<p>this objective.</p> <p>We may substitute the Target Fund with another fund that has a similar objective with the Fund, if, in our opinion, the Target Fund no longer meets the Fund's investment objective. However, this is subject to the Unit Holder's approval before any such changes are made.</p> <p>We may use derivatives, such as foreign exchange forward contracts and cross currency swaps, mainly for hedging purposes. Cross currency swaps and/or foreign exchange forward contracts may be used to hedge the principal and/or the returns of the foreign currency exposure of any of the Class(es) against the Base Currency of the Fund. The employment of derivatives under these circumstances is expected to reduce the impact of foreign currency movements on the Fund's NAV, irrespective of the currency classes. While the hedging strategy will assist with mitigating the potential foreign exchange losses by the Fund, any potential gains from the hedging strategy will be capped as well. The Fund may also employ derivatives for investment purposes to enhance the returns of the Fund by taking a view on the underlying asset or currency, and establish a long position to gain a specific underlying exposure. The Fund may also employ derivatives for investment purposes to enhance the returns of the Fund by taking a view on the underlying asset or currency and establish a long position to gain a specific underlying exposure. The types of derivatives envisaged for investment purposes include forwards and swaps which are over-the-counter or traded on centralized exchanges.</p>

Target Fund Manager	Allianz Global Investors U.S. LLC

5. What are the possible outcomes of my investment?

This Fund is a wholesale feeder fund that invests in the Target Fund, which in turn invests into a portfolio of US high yield bonds. The performance of this Fund would to a great extent be linked to the price movements of the Target Fund which in turn is reliant on the performance of the US high yield bonds that it is invested in.

As such, the value of your investments will be reliant on the performance of the Target Fund. This means that if the Target Fund performs well, the Fund may reflect similar performance and likewise if the performance of the Target Fund falls, the value of your investment will also be affected. The Fund's performance is dependent on the Target Fund Manager's expertise in managing the Fund.

Subject to the availability of income, the Fund endeavours to distribute income for the respective Classes in the following manner, after the end of its first financial year

Class(es)	Distribution Policy
USD Class	Monthly basis
MYR Class	
MYR-Hedged Class	Quarterly basis
SGD-Hedged Class	
AUD-Hedged Class	
GBP-Hedged Class	
EUR-Hedged Class	

Please note that the capital and income distribution of the Fund are not guaranteed.

KEY RISKS

6. What are the key risks associated with this product?

General risks of the Fund

- **Market risk** - Market risk arises because of factors that affect the entire market place. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. It stems from the fact that there are economy-wide perils, or instances of political or social instability which threaten all businesses. Hence, the Fund will be exposed to market uncertainties and fluctuations in the economic, political and social environment that will affect the market price of the investments either in a positive or negative way.
- **Fund management risk** - This risk refers to the day-to-day management of the Fund by us which will impact the performance of the Fund. For example, investment decisions undertaken by us as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraudulent, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
- **Performance risk** - This Fund is a feeder fund which invests in another collective investment scheme, namely the Target Fund. The performance of the Fund very much depends on the performance of the Target Fund. If the Target

Asset Management

Fund does not perform in accordance with its objective, the performance of the Fund will also be impacted negatively. The performance of the Target Fund and consequently of this Fund may go down as well as up, depending on the circumstances prevailing at a particular given time. On that basis, there is never a guarantee that investing in the Fund will produce a positive investment returns in accordance with its objective.

- **Inflation risk** - This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
- **Loan financing risk** - This risk occurs when you take a loan/financing to finance your investment. The inherent risk of investing with borrowed money includes you being unable to service the loan repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower net asset value per unit as compared to the net asset value per unit at the point of purchase towards settling the loan.
- **Operational risk** - Operational risk is the risk of loss due to the breakdown, deficiencies or weaknesses in the operational support functions resulting in the operations or internal control processes producing an insufficient degree of customer quality or internal control by the Manager. Operational risk is typically associated with human error, system failure, fraud and inadequate or defective procedures and controls.

Note: Please refer to the Fund's Information Memorandum on further detail of each risk.

Specific risks the Fund

- **Concentration risk** - The Fund is a feeder fund which invests in a single collective investment scheme. Any adverse effect on the Target Fund will inevitably affect the Fund as well. The performance of the Fund is also dependent on the performance of the Target Fund.
- **Liquidity risk** - This is the risk that the units of the Target Fund that is held by the Fund cannot be readily sold and converted into cash. This can occur when there is a restriction on realisation of units of the Target Fund. The Target Fund Manager may suspend the realisation of units, or delay the payment of realisation proceeds in respect of any realisation request received, during any periods in which the determination of the net asset value of the Target Fund is suspended. As a result, the Fund may not be able to receive the repurchase proceeds in timely manner which in turn may delay the payment of repurchase proceeds to the Unit Holders.
- **Country risk** - Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund to fall.
- **Currency risk** - As the investments of the Fund may be denominated in currencies other than the Base Currency, any fluctuation in the exchange rate between the Base Currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the investments are denominated depreciate against the Base Currency, this will have an adverse effect on the NAV of the Fund in the Base Currency and vice versa. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

Currency risk at the Fund level

The impact of the exchange rate movement between the Base Currency of the Fund and the currency of the underlying investments may result in a depreciation of the value of the investments as expressed in the Base Currency of the Fund.

Currency risk at the Class level

The impact of the exchange rate movement between the Base Currency of the Fund and the currency of the respective Classes may result in a depreciation of your holdings as expressed in the Base Currency of the Fund.

Currency risk at the Hedged-class level

Currency hedging reduces the effect of exchange rate movements for the Hedged-class, but it does not entirely eliminate currency risk between the Hedged-class and the Base Currency (not a perfect hedge). Hence, the unhedged portion of the respective Hedged-class will be affected by the exchange rate movements and it may cause fluctuation of NAV of the respective Hedged-class. You should note however, that if the exchange rate moves favourably, the Fund would not benefit from any upside in currency movement due to the hedging strategy. In addition, hedging is subject to a minimum investment size of entering into a forward contract and cost of hedging which may affect returns of the respective Hedged-class.

- **Target Fund Manager risk** - As a feeder fund, the Fund invests into the Target Fund which is managed by the Target Fund Manager. We have no control over the investment technique and knowledge, operational controls and management of the Target Fund Manager. In the event of any mismanagement of the Target Fund, the NAV of the Fund, which invests substantially all of its assets into the Target Fund, would be affected adversely.

Asset Management

Note: Please refer to the Fund's Information Memorandum on further detail of each risk.

Please note that the Fund, being a unit holder of the Target Fund, assumes the specific risks of the Target Fund. Please refer to the Information Memorandum for more information on the peculiar risks relating to the Target Fund.

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. The various asset classes generally exhibit different levels of risk.

You are recommended to read the whole Information Memorandum to assess the risks associated to the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.
